HTML & CSS

PROFILE

I am holding a Master Degree in Computer Science, and have been working with more than 10 professional years in four different countries.

I'm skilled in PHP programming, have been working on, legacy code, OOP and MVC frameworks.

I have complete control on MVC frameworks, quite skilled in MySQL, have complete control over JavaScript quite familiar with front-end as well. I have a very unique experience in API programming such as Restful and SOAP. Have been working with different payment gateways. I am thinking OO and able of working in both Linux and Windows OS.

I am a very fast learner, and also a very good teacher, willing to share my knowledge.

I have been involved in complete development life-cycle from feasibility studies, planing, design, end user communications and so on which has made me also a very good team leader for utilizing my skills and experiences. I am Individual and a team player.
